

Wash and Fill Station

Want to keep it clean or just a little thirsty? The all in one, robust Wash and Fill Station is great for both cleaning your bike and filling your water bottle on the go. Its robust and theft preventing design includes a vandal resistant hose and nozzle, as well as braided steel cables for the brushes making it ideal for installing in public spaces such as parks.

This product features bicycle specific cleaning brushes and a High Velocity Low Consumption nozzle which has been developed for efficient cleaning power without damaging the bike and minimal water usage. It also is fitted with a smooth flow water filler nozzle and strainer for refilling water bottles, eliminating plastic bottle waste.
