

Tube Vending Machine

The inner tube vending machines from Schwalbe are thoroughly refurbished cigarette machines that hold 60 tubes in six different sizes.

Their highly secure design allows them to withstand most indoor and outdoor conditions. It has internal cooling and optional heating for colder climates.

The Inner Tube Vending Machine can be configured to accept all payment methods including coins, notes, credit and stored value cards.

They are more commonly installed outside of bicycle repair shops for use during unsocial hours allowing access for cyclists 24/7.
