

# Car Bike Port

1 car space = 10 bicycles

Cars cause pollution, congestion and take up lots of space. One car parking space can provide parking for 10 bicycles. The message is, 'ditch the car and start cycling.'

Each unit fits into a standard parking space conveying the message that bicycles are more space efficient than cars.

The Car Bike Port is also an ideal solution for temporary bike parking at events.

## Technical Specification

- Weight : 120 kg
- Dimensions : 4.1m x 1.3m
- Materials : Mild steel racks, aluminium body
