

Cyclehoop Lite

The Cyclehoop Lite is the latest, more cost effective version of a Cyclehoop, converting existing traffic sign posts into secure cycle stands for two bicycles. This award winning product won the street furniture category of the 'Reinventing the Bike Shed' International design competition 2006.

Traditional cycle stands require digging and concreting, and sufficient pavement space. Retrofitting existing street furniture allows cycle parking to be provided in locations where normal cycle stands cannot be installed.

Advantages

- Easy to install with simple tools, saving time and money
- Ideal for locations where pavement space is limited
- Compact design helps reduce street clutter
- Pedestrian friendly as it prevents bicycles from falling over

Security

- The design allows cyclists to lock through the frame and wheels, reducing theft
- Prevents thieves lifting locked bicycles over the top of signposts
- Locking advice stickers educate cyclists on proper locking methods

Technical Specification

- Fits 76mm, 89mm and 60mm diameter signposts
- Ductile SG Iron casting
- Neoprene rubber internal lining
- Supplied with stainless steel shear nuts
- Nylon powder coated in black or grey
