

# Cyclehoop for Signposts

The award winning Cyclehoop for Signposts convert existing traffic signposts into secure cycle stands for 2 bicycles.

Traditional cycle stands require digging, concreting and sufficient pavement space. Retrofitting existing street furniture allows cycle parking to be provided in locations where normal cycle stands cannot be installed.

## Advantages

- Easy to install
- Cost effective
- Ideal where pavement space is limited
- Compact design
- Reduces the risk of theft
- Prevents bicycles from falling over

## Technical Specification

- Fits 76mm, 89m and 60mm diameter raffic signposts
- Ductile SG Iron casting
- Neoprene rubber internal lining
- Supplied with stainless steel shearnuts
