

# Floor Bike Pump

This easy to use bicycle pump by Bike Fixtation© is ideal for installing at indoor and outdoor cycle parking facilities to provide cyclists with a convenient facility to pump up deflated tyres.

This pump with a built in gauge fits the most common bicycle valves.

The floor bike pump is designed to be bolted to a concrete surface for stability and security, its reinforced construction makes it resilient to frequent use.

## Technical Specification

- Heavy-duty floor pump with gauge
- Bolts included to concrete with security fasteners
- Operational range: o 32 to 110° F  
o 0 to 43° C
- Cut resistant air hose with high security pump head (no loose parts)
- Pump head fits Presta and Schrader valves
- TIG welded, thick-walled DOM tubing and laser cut steel shroud to prevent damage to gauge

## Dimensions

- Dimensions (metric): 70 cm H x 24 cm W x 20 cm D
