

# Single Bike Locker

The Single Bike Locker is the perfect way to store your bike securely if you are short on space. The single bike locker is accessed from the end so that unit width is kept to a minimum – great for down the side of a house or flat.

Made from strong, thick, galvanised steel, a guide rail inside the locker holds the bike upright and acts as a second locking point for increased security. There is also a set of hooks included for storage of helmets and accessories.

## Technical Specification

- Weatherproof.
- Made in Britain
- Large single door access.
- Multiple units bolt together for additional strength and security.
- Integral wheel guide and lock point for holding your bike in place
- Supplied with two kit hooks - for hanging helmets and clothes.

## Dimensions

- Height 1200mm
- Width 900mm
- Depth 1900mm
- Door Aperture 1110mm x 790mm
