

STRiDA Stand

The STRiDA Stand is a compact free standing home storage solution specifically designed for the unique folding STRiDA bike. This product is made from 4mm thick steel and fitted with 9mm birch plywood to protect the bike frame.

Flat packed and easy to assemble, the stand holds the STRiDA stable in its vertical folded state with touch points at both the wheel and the frame using minimal space when in use. Multiple units can be stacked to minimise the footprint. The silhouette of the stand echoes the iconic angular shape of the bike whilst remaining true to the minimal footprint of the design.

Technical Specification

- Available in three colours: White, Black and Orange
- Easy to assemble
- Holds one standard Strida wheel size (16 inch) vertically
- Angular shape to match Strida
- Holds the Strida stable with touchpoints on both wheels and frame
- Efficient sheet nesting
- Flat pack and compact design
- 4mm steel sheet
- 9mm birch plywood sheet
- Designed and produced in the UK

Dimensions

- Height: 366mm
- Width: 393mm
- Depth: 311mm
