

Customised Cycle Stands And O Ring Stands

Customised Cycle Stands are perfect for businesses and councils looking to promote their corporate brand or Identity. These simple yet unique pieces of street furniture can be specifically tailored to any requirement with letters, names or logos. Sturdy and secure, our customised cycle stands are made from thick stainless or galvanised steel, and enable the user to lock both the wheels and frame of the bike for increased security against bicycle theft.

Cyclehoop design and build any customised cycle stands based on specific client briefs. Examples include the Lambeth Rings (pictured) commissioned by and installed for Lambeth Council.

Lambeth Ring Dimensions
