Planter Rack

The Planter Rack is a unique product offering secure cycle parking for 6 bicycles as well as built in planters which are ideal for greening public spaces. This product is modular in design and features wheel recesses under the planter keeping its footprint compact. The Planter Rack is made from durable, sustainably sourced wood and thick steel tube stands and also features reflective strips for increased visibility. This robust product is easy to install and requires minimal floor drilling making it ideal for both permanent and temporary parking solutions.

The Planter Rack is available in a range of materials, colours and can planted with all-weather plants.
